The M Period for Reply	AILING DATE of this commun	ication appea	ars on the cover sheet with th	e correspondence ad	ldress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

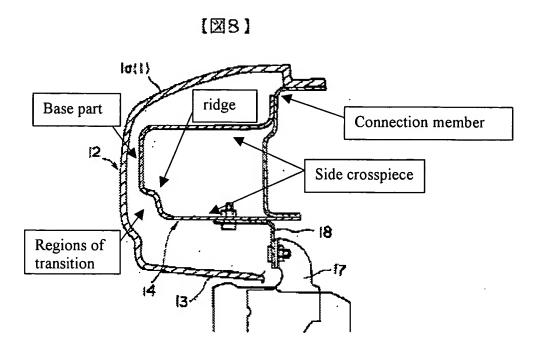

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by JP11-34770.

Regarding claims 1 and 9, JP 11-34770 discloses a bumper for a motor vehicle (1), comprising: an outer bumper (12) part; and an inner bumper part (14) including a base part (see below) and at least one side crosspiece (see below- this limitation is met by the lower crosspiece) positioned at an angle to the base part, regions of a transition (see below) from the base part to the side crosspiece configured so that deformation of the inner bumper part occurs in a predetermined direction (the corner of the ridge is a stress raiser with the highest bending moment arm and therefore would be the point of failure in response to a force, since the failure location would be known then the direction of failure would also be known) in response to a force applied to the bumper, the region of the transition from the base part to the side crosspiece including a ridge pointing in a desired direction of deformation, wherein the outer bumper part is connected to the inner bumper part (via connection member-see below).

Art Unit: 3612

Regarding claim 2, JP11-34770 discloses the bumper according to claim 1, wherein the ridge includes a triangular cross-section (see above).

Regarding claim 3, JP11-34770 discloses the bumper according to claim 1, wherein the inner bumper part includes two side crosspieces (see above).

Regarding claim 4, JP11-34770 discloses the bumper according to claim 3, wherein the side crosspieces are aligned parallel to each other (see above).

Regarding claim 5, JP11-34770 discloses the bumper according to claim 3, wherein the side crosspieces are aligned substantially horizontal in an installed state (see above and Fig. 8).

Regarding claim 6, JP11-34770 discloses the bumper according to claim 1, wherein the transition from the base part to at least one side crosspiece includes a radius (see above).

Regarding claim 7, JP11-34770 discloses the bumper according to claim 6, wherein the ridge is arranged in a region of the radius (see above).

Art Unit: 3612

Regarding claim 8, JP11-34770 discloses the bumper according to claim 1, wherein the ridge extends over a substantial part of a width of the inner bumper part (inherent).

Page 4

Response to Arguments

3. Applicant's arguments filed September 26, 2005 have been fully considered but they are not persuasive. The Applicant argues that JP 11-34770 does not disclose that the inner part of the bumper is connected to the outer bumper part. The Examiner points to the connecting member which is the rear of the inner bumper part which connects to the outer bumper part.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time 4. policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 10/810,115

Art Unit: 3612

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Engle whose telephone number is (571) 272-6660. The examiner can normally be reached on Monday - Friday from 8:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, D. Glenn Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
